

Pupil Voice Survey Summary

Subject Leader: Alistair Ward

Subject: PSHE/RSE

Date: 18th September 2026

Intent

For children to have an improved recall of skills learned and how they can be used in the day to day lives. To understand my new role in school (Personal Development Lead). For children to have a greater variety of enrichment days and external visits. To equip the children of our school with skills and knowledge to cope with everyday life inside and outside of school within their families and the wider community. To understand the importance of having an open mind, their own opinions and to develop resilience. To realise within school and the wider community there are other faiths, cultures and beliefs which all matter. To introduce With Me in Mind programme, alongside Mental Health Ambassador training, as an additional layer of support – mental wellbeing.

Impact – Evidence of Progress

After gathering evidence from each year group in the Summer 2 Term, I have noticed a noticeable change in a variety of areas. A greater number of pupils enjoy PSHE/RSE lessons and think it is pitched at their level. They now can recall a greater number of skills they have learned and also the enrichment days we have in school. They now understand that these lessons help them to be a better friend; safer inside and outside of school and also have a greater awareness of their own mental well-being. Pupils are therefore engaged and acquire specific skills that can be applied outside of school e.g. road and water safety. To summarise, pupils have continued to garner a greater variety of applicable skills and feel more confident talking about themselves. Clear progression of skills is evident from Foundation Stage up to Year 6 (please see example
